

RETHINK - REOPEN - REBOUND

REOPENING RESPONSIBLY

The Yountville Chamber is here to help support you and your business through these trying times.

Let's examine the elements of Manpower, Time and Resources against each other especially as you implement a new course of action towards the Next Normal.

MANPOWER

Your employees.

How many do you need to open?

What interval will you need them?

Will any type of training be necessary?

What can you sustain?

Will you go back to full staff versus following a graduated plan to increase as business increases?

TIME

Your hours of operation will be key to reopening.

Everything from prep time to actual hours the doors are open must be considered.

Weekends or not?
Which hours best fit with the new habits of your core customers?

What buyer habits have changed?

Can you get the products or services you need when you need them?

RESOURCES

Resources are both goods and services your business needs, plus human capital - employee balance and customers.

Resources are the internal and external commodities you cannot do without.
